SUMMARY

Enthusiastic and detail-oriented Electronics and Communication Engineering student with knowledge of embedded systems, communication technologies, digital electronics, and signal processing. Skilled in C, Python, MATLAB, and VHDL with strong analytical, problem-solving, and teamwork abilities. Eager to contribute to innovative engineering projects while continuously enhancing technical expertise.

TECHNICAL SKILLS

ECE skills

- Electronics Basic
- Digital Logic Design(DLD)
- Solid State Device

Programming Languages

- Java (Basics)
- Python

Database

- MySQL
- SQL-lite

PROJECT

Decoder Reduction Approximation Scheme for Booth Multipliers

- Designed an optimized Booth Multiplier architecture for efficient arithmetic operations.
- Reduced hardware complexity and improved computational performance.
- Analyzed accuracy and speed trade-offs in digital circuit design.

Sleep Disorder Prediction using Machine Learning

- Built a machine learning model to predict sleep disorders from health-related data.
- Performed data preprocessing, visualization, and feature engineering.
- Applied classification algorithms and evaluated model performance.

EDUCATION

SRM-UNIVERSITY

2022-2026
